Jane Henney, M. D. Commissioner
United States of America Food and
Drug Administration
5600 Fishers Lane, Room 1471
Rockville, Maryland

Dear Dr. Henney:

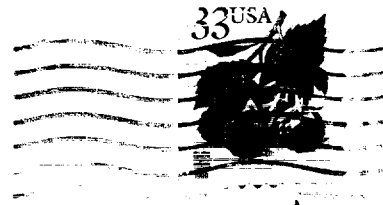

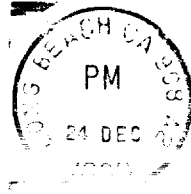

Please use your leadership potential as commission of the federal department regulating use of pharmaceuticals to direct that department into following the example of the European Union in its banning as authorized uses of antibiotics used to treat human pathology, the utilization of those same medications to promote the growth of cattle, of chickens and of pigs. Extensive use of antibiotic as growth stimulators yields diseases which are antibiotic resistant.

In reference to this dilemma, I look forward to learn what actions have and/or will be initiated. I wish you and your family a new year guilded in good health and in peace.

Yours truly,

K Bandell
